

Data Sheet

Reference No.: 57137

Centerless Grinder

Brand: LIDKÖPING
Model: 4B
YoM, approx.: 1970 used
Reconditioned: 2018
Controls: electronic controls

Working Range External Grinding

grinding diameter (max): 508 mm
grinding length: 3500 mm

Spindlestock Grinding Spindle

continuous speed variation: yes
drive power: 42000 kW

Dimensions / weights

total weight approx.: 8000 kg

Additional Information:

We are selling our own Lidköping 4B centerless grinding machine with circulation station from our subsidiary in Slovakia. The machine is powered and can be inspected. The circulation station is suitable for shafts up to a length of approx. 3,000 mm. This means that shafts with multiple grindings can be continuously finished. The coolant system has a cooling system for tempering the coolant. The Lidköping 4b grinding machine has an adjustable grinding and regulating wheel. The machine is from 1970 and was completely overhauled technically and electrically at Markmetall in 2010. The grinding machine was rebuilt in 2018 with a newly built circulation station from SH attachments/Markmetall. Since then, the machine can be operated as an automatic centerless grinding machine. Extensive documents are available.
