

Características técnicas:

Nº de referencia 57137

Centerless Grinder

Marca: LIDKÖPING
Modelo: 4B
Año de fabricación: 1970 used
Reconstruida: 2018
Control: Control electrónico

Rango de rectificado externo

Diámetro rectificado (max): 508 mm
Longitud rectificado: 3500 mm

Spindlestock Grinding Spindle

Velocidad continua: Sí
potencia del motor: 42000 kW

Dimensiones / peso

Peso total aprox.: 8000 kg

Información adicional:

We are selling our own Lidköping 4B centerless grinding machine with circulation station from our subsidiary in Slovakia. The machine is powered and can be inspected. The circulation station is suitable for shafts up to a length of approx. 3,000 mm. This means that shafts with multiple grindings can be continuously finished. The coolant system has a cooling system for tempering the coolant. The Lidköping 4b grinding machine has an adjustable grinding and regulating wheel. The machine is from 1970 and was completely overhauled technically and electrically at Markmetall in 2010. The grinding machine was rebuilt in 2018 with a newly built circulation station from SH attachments/Markmetall. Since then, the machine can be operated as an automatic centerless grinding machine. Extensive documents are available.
