Washing Machine - continuous

Brand: LUMIPLAS
 Model: CRITICAL FLOW
 YoM, approx.: used
 Reconditioned:
 Controls:

Surface Treatment, usable Process Space / Zone

length: 5220 mm
 larghezza: 1500 mm
 Height: 2500 mm

Additional Information:

HEIGHT: 2.5 metres + 1.35 metres of the stem which is not shown in the photo when fully extended.
 Working at a speed of 8 baskets/hour. But the speed is adjustable. Maximum weight per basket is 30 kilos. It has been washing stainless steel parts. As for the baskets, they are not available as they have been used in another machine. We do have some samples available so that we can manufacture new ones from these measurements. The machine is installed with two tanks, one of them with two sections (in the attached documentation, there is a description of the steps of the double tank). The other tank is installed additionally to improve the process. Both tanks are equipped with ultrasound. The robot is mechanical and is prepared to work only with the first tank, or only with the second one, or both at the same time. It has all three programmes installed. For the products that we used to use in it, we can give the contact details. We used to use INVENTEC products. Translated with DeepL.com (free version)
