Additional Information:

The machine has 10,700 operating hours and 1,600 spindle hours, of which approximately 1,000 hours were warm-up time. The vise can be purchased separately for an additional charge. The machine is equipped with its own cooling system, but is currently connected to a central cooling unit. To use the built-in cooling system, a pump would need to be retrofitted. A parts list for the required components can be provided. Overall, the machine is in like-new condition.
