Tube Welding Line

Brand: DREISTERN
Model: RS30
YoM, approx.: 1980 used
Reconditioned:
Controls:

Product (profile, tube)

external diameter min.:	11 mm
external diameter max.:	38 mm
wall thickness min.:	0.8 mm
wall thickness max.:	2 mm

Line Characteristics

welding process:	HF inductive
sawing process:	travelling
speed max.:	120 m/min

Electrical specifications

mains power supply:	440 kVA
---------------------	---------

Additional Information:

For sale is a fully serviced and excellently maintained tube welding line from MUBEA (Switzerland). The line was previously used for the production of USM Haller furniture tubes, but it is designed for a wide range of tube diameters, making it highly versatile for different manufacturing requirements. Welding is carried out with an induction HF system from EFD Induction, built in 2018, ensuring a modern and efficient welding process. Total line length: approx. 100 m Operation: handled by 7 operators Condition: well-maintained, fully operational Scope of delivery: complete package An excellent opportunity for companies looking for a reliable and high-performance tube welding line.
