Manufacturer's specifications: Servomechanical direct drive with two servo motors; freely programmable motion profiles (accurate to the millisecond) for acceleration/braking, part removal, and intermediate stops. High process reliability thanks to sensitive sensor table and patented tool compartment; greatly reduced braking distances. Energy management with energy recovery/standby; up to ~40% less energy consumption compared to prior generations. Optional peripherals: servo-driven, integrated part removal up to ~150 SPM; low oil mist, metered spray lubrication.
